

COOLING As a work of literature going in depth in the life of certain humans thus removing quick prejudices against them, the documenting subject also brings a much enlarged detail of human nature using the very medium that now undermines it with neurotic attacks from the mass.

UNINDEXED The fact that all the documenting subject's project is a chronological flow without any tags does not create an artificial intelligence but on the contrary stimulates his natural intelligence and that of the viewer.

ANCIENT While always feeling misplaced and as a foreigner in other people land the documenting subject roots deeply in it transcending all private and national belongings.

SAFE After some hesitation the documenting subject has decided to make all his generated data available to the public firstly because the public is concerned with completely different vulgar matters and secondly because the algorithms governing the bigger institutions will never be able to make a thing out of all the provided data as it is human generated and requires another human intelligence to learn to make meaning out of it.

LIBERATED Attempting perfection only the spiritual domain he has generated the documenting subject is free of all the commodities and maniac functionalism typical of his contemporaries.

SERIOUS While since the beginning he was often accused of doing something demential or anyway too weak and attackable the documenting subject has moved forward with his project building a full working framework around it and keeps existing as an entity outside the official cultural and intellectual mainstream that it is too entangled with issues of power and representation and has become a form of mannerism from which meanings are just more conventions.

DREAMING Despite the increasing regulations of also the creative and intellectual practices the documenting subject keeps up with his dream as something spiritual and undefined by all the life suffocating social apparatus.

FREE Given the fact that the documenting subject has already set in advance what to achieve he does not work like all his contemporaries for the endless expansions and crazy restructuring of their black hole institutions consuming their souls.
